STAT

MEMORANDUM FOR:

SUBJECT : Request for Comments

At our meeting this morning on the IC Staff's draft Semi-annual NSC Intelligence Review, it was the consensus that the report suffered from a number of inadequacies. Mr. Lehman believes that we should provide comments in depth and will see that our original deadline is extended so that we may do so. At this point, we intend to lead off with a series of general criticisms and, then, to follow up with a series of commentaries on the draft report's comments on the various geographic and functional areas. Mr. Lehman asks that you have your contributions to both sections to me by COB November 10th. I will combine them and circulate a draft response shortly thereafter for your comment.
